

Emirhan İnan

SOFTWARE DEVELOPER & 3D ARTIST

Professional Summary

Software developer and 3D artist specializing in next-generation game engines and social platforms. Most recently embracing **Vibe Coding**—an intuitive, flow-state approach to development orchestrating AI tools to rapidly prototype complex systems. Blending robust programming with artistic vision to create highly optimized digital experiences.

Experience & Journey

Nexus Studio 2026 - Present Founder & Lead Developer

- Engineered a Vibe Coding-based game engine editor supporting C# and Luau from scratch, featuring an optimized, lightweight architecture.
- Implemented a custom UI/UX system maximizing developer productivity and modern aesthetics.

Linker 2025 - Present Founder & Full-Stack Developer

- Developed a multi-functional social media platform using a mesh network architecture, allowing users to share Feeds and Stories entirely without internet access.

Roblox Game Development 2021 - 2024 Game Developer & 3D Environment Artist

- Created optimized, stylized 3D environments using Blender and Substance Painter, and developed interactive experiences with advanced Luau scripting.
- Authored "Nexus-Plugin" for Roblox Studio, a BYOK tool enabling Vibe Coding workflows.
